

Use the chart below to compare any two plants in two different greenhouses. Can you tell **what is alike** and **what is different** about the plants such as colour, shape, texture, smell, stem, leaves, environment, height, and so on.

Plant Comparison Chart

A large graphic consisting of a dashed blue border forming a grid. The grid is divided into four quadrants by a vertical and a horizontal dashed line. The top-left and bottom-right quadrants are white, while the top-right and bottom-left quadrants are filled with a light green color. This grid is intended for students to compare two plants.

Draw a line connecting the function on the left to the matching plant part on the right.

Acts like a straw and brings water to all the parts of plant

Traps sunlight to help the plant to make food

Will turn into fruits

Contains seeds

Holds the plant in the ground and helps it get food from the soil

Makes new plants
